PERSONAL PROJECTS

Shuruup – Core Product Development

Laravel |Duration: Ongoing
- Developed core product features using Laravel (basic to advanced).
- Integrated Digio API (SMS) and 11za API (WhatsApp).
- Deployed and managed website hosting on a live server.
- Built Shuruup's frontend using HTML, CSS, and JavaScript.

Private Deal Room

Laravel & React |Duration: 5 Months
- Built full-stack platform for managing startup investments.
- Created secure REST APIs for deals, users, and workflows
- Used role-based access for investors, leads, and startups.
- Developed responsive UI with React for smooth navigation.
- Optimized API performance and collaborated on deployment.

Incubation

Laravel |Duration: 4 Months
- Built a full-stack platform to manage startup applications, funding, and mentorship.
- Developed secure APIs and role-based access for admins, startups, mentors, and investors.
- Integrated document uploads, funding workflows, and optimized data models using Laravel queues for background tasks.

PROFILE

Skilled Computer Science student with hands-on experience in full-stack development. Proficient in Laravel, RESTful APIs, authentication, and scalable database design. Built and deployed real-world platforms with role-based access, API integrations, and background job processing. Eager to contribute as a capable and growth-focused Software Developer.
